Intensive ROS2 Course Certification

Intensive ROS2 Course Optional Certification

This Intensive ROS2 Course is free, and you have an open possibility to certify what you will learn.

We offer a diploma in collaboration with the New Model Institute for Technology and Engineering (NMITE), a UK University.

This will ratify that you have competencies in developing, configuring, and modelling robotic systems using URDF and spatial transformations within the ROS 2 framework for practical engineering applications.

NEW ENGINEERS
FOR A CHANGING WORLD

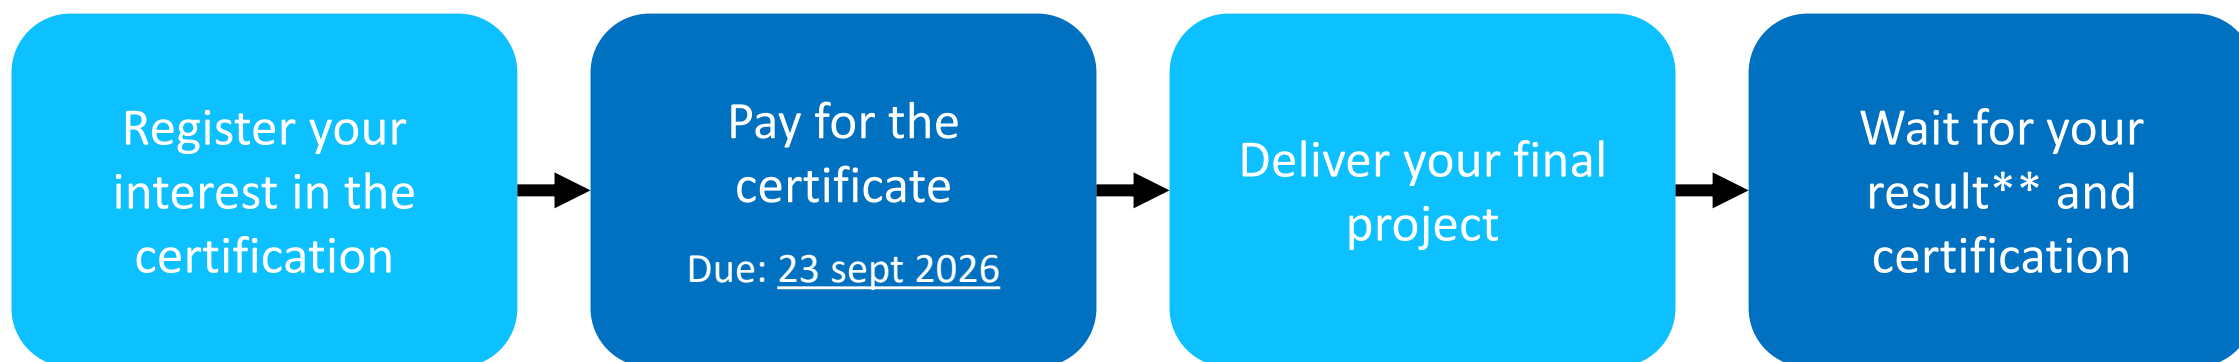

Intensive ROS2 Course Certification – Final Project

To gain the diploma you must complete a final project.

- The final project is the course's assessment.
- You must deliver your code and a video report.
- **Only those who pass the challenge will be eligible for certification.**
- Project specifications will be announced next week.

Certification Roadmap:

** Results will be delivered on Monday, September 28th , 2026.
